

SISTEM OF DOCTRINE DEVELOPMENT TO THE ARMED FORCES OF THE REPUBLIC OF NORTHERN MACEDONIA

Col. Assoc. Prof. Kalin Gradev, PhD, major Jarko Iliev

Abstract: *Since the adoption of the Republic of Northern Macedonia (RNM) as a NATO member, many issues have arisen in connection with the acquisition of capabilities by the RNM Army. Doctrines and concepts as the first imperative of capabilities should be placed as a top priority in terms of both development and maintenance in their current state and their synchronization with NATO concepts and doctrines. One of the working approaches is to carry out this process on the basis of analysis and comparison of the current state of the nationally regulated norms and adopted standards as well as the establishment of the system for development of the publications of the national armed forces.*

Key words: *doctrine, concept, Republic of Northern Macedonia, NATO, approaches for enhancement, system for development of the publications.*
