

CONCEPTUAL FRAMEWORK OF TACTICAL ACTIONS IN MODERN CONDITIONS

Kalin Gradev

Abstract: *The study of the nature of modern combat, its organization, patterns, principles and methods for its conduct require a thorough approach to theory and practice and are the basis of military theoretical training of any serviceman. The connection of ground operations with tactical actions requires disclosure of the approaches for their planning and implementation, as well as the constituent components necessary for the effective implementation of the set missions, tasks and objectives.*

Key words: *tactical actions, combat power framework, spatial framework, functional framework, operational framework and resource framework.*
